

TRANSPORT PACKAGING SOLUTIONS

D-Board Light

Protection, stability and stacking strength

D-Board Light (DBL) is a lightweight but strong 100% recyclable multimedia honey board excellent for any visual communication (VISCOM) purpose whether in the graphic or advertising sector.

- Water-based glue
- Strong structure
- Lightweight
- 100% Recyclable
- Environmentally-friendly
- Excellent surface for printing
- Good for the both heat and sound isolation

D-Board® Light can easily be printed, shaped or cut into elements required for print or constructions.

Sustainable packaging is your contribution to the environment

The D-Board® Light is a graphic cardboard which is designed for flat printing, adhesion, glueing, stand construction, furniture, displays for different events and P.O.S. Its production incorporates recycled cardboard with 100% recyclable raw material. Its hexagonal (honeycomb) cellular structure and superior raw material makes them also structurally strong providing exceptional strength and rigidity.

D-BOARD LIGHT QUALITIES

The D-Board® Light is a structure reminiscent of the very durable flatter and smoother Honeycomb cells (8 & 13 mm cell) which allows a more precise impression and offers an easy and clear cut. The boards with a thickness from 10 to 30 mm give us the freedom to create objects and structures in 3 dimensions at a low cost.

The D-Board® Light Kraft colour is designed for all the jobs where you want to show the recycled and/or ecological side of your projects.
